Other Quality Industrial Products

V-Seals™

A simple, versatile elastomeric "face-type" seal produced in Nitrile or Viton, Timken's line of V-Seals™ function as an additional sealing element. V-Seals are recommended for extreme, high-contaminant environments.

The V-Seal typically mounts on and rotates with the shaft while the lip lightly contracts the counterface. The elastic design eases installation, within a broad range of applications.

Wear Sleeves

As precision components that press-fit onto a shaft, Timken's line of Wear Sleeves may deter damage to shafts and spindles, both in use and during transport.

Designed for ambient-temperature assembly and available in various sizes and finishes, Wear Sleeves provide protective seal running surfaces and reduce the need for complex and expensive shaft machining, repair or replacement.

O-Ring Seal Kits

Available in inch and metric sizes, Timken's line of O-Ring Seal Kits have the coverage you need for the most popular applications. O-Ring Seals are made of a high-quality Nitrile rubber or a high-temperature fluoroelastomer.

Timken can provide you with three assortments: OK-311, OK-312 and OK-411. The MD-999 O-Ring identification gauge, designed to measure and identify O-Ring sizes.

Installation Tools

The RD-2000 and RD-2001 tools help to properly install seals and prevent unnecessary downtime.

Timken's RD-2000 Seal Driver puts seals in place quickly, easily and without damage, allowing smooth equipment operation without premature seal leakage.

The RD-2001 Bearing Race and Seal Driver easily installs bearings and seals without damaging the bearing race or housing.

Timken also offers the time-saving RD-2004 O-Ring Installation and Removal Tool, as well as the durable and precise MD-2000 Metal Caliper.
